

## FAMILY PLEDGE FORM FOR EYE DONATION

Date : \_\_\_\_\_

We make this irrevocable Pledge for Sight, effective upon our death, committing our eyes to the Eye Bank. The primary purpose of this anatomical gift is corneal transplantation to cure needless blindness, with secondary uses for essential research and education. We understand that time is critical; therefore, we promise to contact the Eye Bank's team instantly following any death, allowing this ultimate gift to be successfully fulfilled."

# VIJAY EYE CARE HOSPITAL

*Complete Eye Care & Vision Solutions*

## ESSENTIAL FACTS ON RESTORING SIGHT

India faces a critical challenge: millions are corneal blind, and thousands are added to the waiting list every year. This needless tragedy can be overcome—you hold the power to restore sight through a simple act of donation.

- Register yourself, your family, and friends with the Vijay Eye Care Hospital Eye Bank to become Vision Advocates.
- Conditions like Diabetes, Hypertension, Advanced Age, or wearing Spectacles DO NOT disqualify a donor.
- Eyes must be retrieved within 4 to 8 hours of demise to ensure viability for transplantation.
- Our certified team will reach the donor's location (residence or hospital nearby) promptly, day or night.
- The collection procedure is quick (approx. 20 minutes) and does not cause disfigurement to the donor's face.
- The deceased person does not need to have previously pledged their eyes, but immediate family consent is essential.
- The collection, testing, processing, and distribution of the eyes are managed by the Eye Bank totally free of charge.

### When Death Occurs, Here is Your Immediate Action Plan:

- Confirm the family's desire for donation.
- IMMEDIATELY call the Vijay Eye Care Hospital Eye Donation Helpline
- Place a bag of ice or a cold compress on the closed eyes.
- Elevate the donor's head with a pillow and switch off the fan / air-conditioner to minimize drying.

## DONATE EYES, SHARE THE LIGHT.
